Production Incident Report

Synthetic document created for document-parsing evaluation.

Incident summary

Incident	INC-2026-042	Severity	SEV-2
Service	Document Router API	Status	Resolved
Start	09:14 IST	Resolution	11:26 IST

Impact

17.4% of synthetic requests received HTTP 503 responses. No data loss was observed.

Timeline

Time	Event
09:14	Error rate increased
09:17	Alert triggered
10:02	Configuration rollback applied
11:26	Incident resolved

Root cause

Connection pool exhaustion occurred after a deployment changed the retry interval from 2 seconds to 200 milliseconds.

Log excerpt

```
2026-10-22T09:16:44+05:30 ERROR pool exhausted request_id=test-7f31 route=/parse status=503
2026-10-22T09:17:01+05:30 WARN retry scheduled delay_ms=200 attempt=4
2026-10-22T10:02:19+05:30 INFO configuration rollback applied retry_ms=2000
2026-10-22T11:26:08+05:30 INFO incident resolved health=green
```

Corrective actions

1. Restore retry interval.
2. Add saturation alert.
3. Introduce load-test gate.
4. Document rollback criteria.
