What's new? Given yesterday's data, we believe the resilience in patient additions despite seasonality was driven by several key factors. AI-driven targeting to identify high-value prescribers and predict patient persistence (as noted by the management during our discussion post call), and the Patient Services Group actively managing prior authorization and refill workflows that ultimately determine conversion rates are potentially some of the key reasons behind the resilience, in our opinion. This was also the first quarter where Madrigal felt the full force of seasonal reverifications across the entire patient base, and we believe those learnings might help optimize future 1Q performance. Additionally, we think that the endocrinology field force, just six months in, represents a largely untapped prescriber channel. The fact that NBRx in April reached their highest level since launch, even with Wegovy on the market for three quarters, tells us that GLP-1 competition is not taking share from Rezdiffra. On the pipeline, Madrigal added ARO-PNPLA3, a clinical-stage GalNAc-siRNA with published Phase 1 data showing 46% liver fat reduction from a single dose in PNPLA3 I148M homozygous patients, with clean genotype specificity and durability, which we think significantly de-risks the program. This targets roughly 30% of F2/F3 patients who face 2x higher event risk, disproportionately Hispanic, and in our opinion, represents a precision medicine angle quite differentiated from GLP-1s. Combined with the six preclinical siRNA targets, Madrigal now has seven genetically targeted programs addressing non-responders and high-risk subpopulations. Interestingly, we note that the combination strategy is taking shape across three distinct forms. Ervogastat and MGL-2086 target broad-population enhanced efficacy as potential fixed-dose oral combinations, while the siRNA programs target genotype-defined subgroups as a daily pill paired with a quarterly-to-semi-annual injectable regimen. To support the speed of development, we expect Phase 2 studies to be NIT-based with MRI-PDFF as the primary endpoint, with a clear go/no-go bar, the combo data must be meaningfully different from Rezdiffra monotherapy to advance.

How does it alter our thesis and latest thinking? The revenue beat, the best NBRx month since the launch, and the continued steady patient additions directly validate our view that near-term headwinds are manageable as long-term factors such as expanding TAM, low penetration, and competitive coexistence remain important factors to be considered as one continues to think about the commercial program. Most importantly, we like Madrigal's bullishness in developing combination therapies which was boosted by the clinical stage PNPLA3 asset acquisition. Management now has three distinct combination strategies, Ervogastat for broad-population enhanced steatosis reduction, MGL-2086 for pharmacologically inducing the weight loss that potentiates Rezdiffra's anti-fibrotic effect, and ARO-PNPLA3 for genotype-targeted precision therapy in a high-risk subpopulation. With respect to the development speed, we think Phase 2 studies might be NIT-based (primarily MRI-PDFF with fibrosis biomarker panels), and the bar for Phase 3 advancement is that combo data must be "meaningfully different" from Rezdiffra alone. We also note that the endocrinology expansion is an underappreciated growth driver. With over 10,000 prescribers now and GI outnumbering hepatology 10:1, the endo channel represents a largely untapped patient population, patients already on background GLP-1 therapy who still present with F2/F3 MASH.

What new questions have emerged? The DTC campaign is a new spending category with no established ROI in MASH, we need to see whether it's driving patient self-referrals or reinforcing awareness among already-diagnosed patients. Do endocrinology practices have diagnostic workflows to stage patients and initiate Rezdiffra. On the pipeline side, the key open question is what endpoints FDA will require for combination approvals?

What work do we anticipate doing? We plan to conduct KOL interviews focused on DTC effectiveness, endocrinologist receptivity to Rezdiffra, and clinical views on combination trial design, specifically what level of incremental efficacy over monotherapy would change prescribing practice.

What are we looking for going forward? EASL Congress (May 27-30), a MAESTRO-NASH/NAFLD1 secondary analysis on Lp(a)/LDL-C reduction (CV-risk read-through, statin-independent) and two real-world efficacy posters with up to 12 months of follow-up. MGL-2086 Phase 1 SAD initiation in 2Q, first clinical read on the oral GLP-1 strategy. Ervogastat DDI study initiation in 4Q 2026, confirms whether the fixed-dose oral combination pathway is viable. ARO-PNPLA3 regulatory engagement on Phase 2 design will signal whether FDA accepts a genotype-restricted approach. MAESTRO Outcomes remains on track for 2027, with positive data opens the nearly 245,000-patient F4c indication and makes Rezdiffra the first fully approved *MASH* therapy with outcomes data, well ahead of any *competitor*.

Catalyst Calendar

Program	Indication	Event	Timing
Rezdiffra	MASH	EASL Congress — 8 abstracts including Lp(a)/LDL-C CV risk data and real-world efficacy	May 27-30th 2026
MGL-2086 (oral GLP-1) Phase 1 SAD initiation	MASH	Phase 1 trial on track to initiate	2Q 2026
ARO-PNPLA3	MASH	ARO-PNPLA3 regulatory engagement on Phase 2 combo design	2H 2026
Ervogastat	MASH	Ervogastat/resmetirom DDI study initiation	4Q 2026
Rezdiffra	MASH	MAESTRO-NASH Outcomes (F4c) data readout	2027
Rezdiffra	MASH	MAESTRO-NASH (F2/F3) supports full approval	2028

Source: Company report; H. C. Wainwright research.

1Q26 in numbers. The company *reported* total revenues of $311.3M for 1Q26. Reported R&D expenses were $108.7M (inclusive of $54.3M in one-time upfront business development expenses), and SG&A expenses were $268.5M, driven by the endocrinology field force expansion and a new DTC campaign. Net loss was $94.4M, or ($3.25) per share. As of March 31, 2026, the company reported $817.9M in cash, cash equivalents, restricted cash, and marketable securities.

Valuation and Risks. We reiterate our $620 PT and our Buy rating. We estimate the intrinsic value of MDGL in our rNPV model as the sum of Rezdiffra in MASH with moderate-to-advanced fibrosis (F2-F3) in both the U.S. and EU at $596 per share; and in MASH with compensated cirrhosis in both the U.S. and EU at $34.4 per share (75% PoS). Conservatively, we accrue zero terminal value beyond the 2033 projection period and assign no value to the combination pipeline (Ervogastat, MGL-2086, ARO-PNPLA3, or the six preclinical siRNA programs), which represents potential upside to our valuation as clinical data emerge. Key risks to our rating and PT include: (1) failure to obtain full FDA and EMA approvals across F2-F4c; (2) clinical trial failure or equivocal data in the MAESTRO-NASH Outcomes study; (3) meaningful delays to our expected timelines, including combination Phase 2 programs; (4) unforeseen competitive threats from GLP-1-based MASH entrants or other development compounds;

(5) higher-than-expected SG&A spend without commensurate patient additions; and (6) inability to fund operations through the MAESTRO Outcomes readout without additional capital.

H.C. WAINWRIGHT & CO, LLC RATING SYSTEM: H.C. Wainwright employs a three tier rating system for evaluating both the potential return and risk associated with owning common equity shares of rated firms. The expected return of any given equity is measured on a RELATIVE basis of other companies in the same sector. The price objective is calculated to estimate the potential movements in price that a given equity could reach provided certain targets are met over a defined time horizon. Price objectives are subject to external factors including industry events and market volatility.

RETURN ASSESSMENT

Market Outperform (Buy): The common stock of the company is expected to outperform a passive index comprised of all the common stock of companies within the same sector.

Market Perform (Neutral): The common stock of the company is expected to mimic the performance of a passive index comprised of all the common stock of companies within the same sector.

Market Underperform (Sell): The common stock of the company is expected to underperform a passive index comprised of all the common stock of companies within the same sector.

Investment Banking Services include, but are not limited to, acting as a manager/co-manager in the underwriting or placement of securities, acting as financial advisor, and/or providing corporate finance or capital markets-related services to a company or one of its affiliates or subsidiaries within the past 12 months.

Distribution of Ratings Table as of May 6, 2026

			IB Service/Past 12 Months	
Ratings	Count	Percent	Count	Percent
Buy	559	84.70%	163	29.16%
Neutral	59	8.94%	11	18.64%
Sell	2	0.30%	0	0.00%
Under Review	40	6.06%	14	35.00%

H.C. Wainwright & Co, LLC (the “Firm”) is a member of FINRA and SIPC and a registered U.S. Broker-Dealer.

I, Andrew S. Fein, Ananda Ghosh, PhD and Abigail Gray , certify that 1) all of the views expressed in this report accurately reflect my personal views about any and all subject securities or issuers discussed; and 2) no part of my compensation was, is, or will be directly or indirectly related to the specific recommendation or views expressed in this research report; and 3) neither myself nor any members of my household is an officer, director or advisory board member of these companies.

None of the research analysts or the research analyst’s household has a financial interest in the securities of Madrigal Pharmaceuticals, Inc. (including, without limitation, any option, right, warrant, future, long or short position).

As of April 30, 2026 neither the Firm nor its affiliates beneficially own 1% or more of any class of common equity securities of Madrigal Pharmaceuticals, Inc..

Neither the research analyst nor the Firm knows or has reason to know of any other material conflict of interest at the time of publication of this research report.

The research analyst principally responsible for preparation of the report does not receive compensation that is based upon any specific investment banking services or transaction but is compensated based on factors including total revenue and profitability of the Firm, a substantial portion of which is derived from investment banking services.

The Firm or its affiliates did not receive compensation from Madrigal Pharmaceuticals, Inc. for investment banking services within twelve months before, but will seek compensation from the companies mentioned in this report for investment banking services within three months following publication of the research report.

The Firm does not make a market in Madrigal Pharmaceuticals, Inc. as of the date of this research report.

The securities of the company discussed in this report may be unsuitable for investors depending on their specific investment objectives and financial position. Past performance is no guarantee of future results. This report is offered for informational purposes only, and does not constitute an offer or solicitation to buy or sell any securities discussed herein in any jurisdiction where such would be prohibited. This research report is not intended to provide tax advice or to be used to provide tax advice to any person. Electronic versions of H.C. Wainwright & Co., LLC research reports are made available to all clients simultaneously. No part of this report may be reproduced in any form without the expressed permission of H.C. Wainwright & Co., LLC. Additional information available upon request.

H.C. Wainwright & Co., LLC does not provide individually tailored investment advice in research reports. This research report is not intended to provide personal investment advice and it does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this research report.

H.C. Wainwright & Co., LLC's and its affiliates' salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies that reflect opinions that are contrary to the opinions expressed in this research report.

H.C. Wainwright & Co., LLC and its affiliates, officers, directors, and employees, excluding its analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives (including options and warrants) thereof of covered companies referred to in this research report.

The information contained herein is based on sources which we believe to be reliable but is not guaranteed by us as being accurate and does not purport to be a complete statement or summary of the available data on the company, industry or security discussed in the report. All opinions and estimates included in this report constitute the analyst's judgment as of the date of this report and are subject to change without notice.

Securities and other financial instruments discussed in this research report: may lose value; are not insured by the Federal Deposit Insurance Corporation; and are subject to investment risks, including possible loss of the principal amount invested.
